Mathematica as a Programming Language

Andy Keck

In the words of the poet Starr¹:

for, huh!
What is it good for?
Absolutely nothing.
Say it again.

Every computer programmer has enjoyed² countless hours tracking down bugs related to iteration variables and array indices. In this talk I will discuss the Mathematica programming language and its emphasis on structure manipulation and function mapping to implement repetition.

Friday, September 29
2:00–2:50 P.M.
Hurst 101

¹Edwin Starr 1942–2003
²It is rumored that Siddhartha Gautama attained nirvana while contemplating a triply nested for loop with several breaks and continues.
